Steps to push code to github

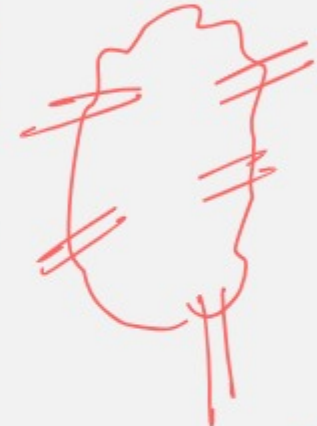

1. create a github repo
2. run git commands
 - ↳ git init
 - ↳ git add -m "message"
 - ↳ git commit -m "main"
 - ↳ git remote add origin
 - ↳ git push -u origin main
3. If you make changes in local & pushing.
 - ↳ git status
 - ↳ git add -m "message"
 - ↳ git commit -m
 - ↳ git push

↳ repository
↳ pull, push, commit
↳ config email, username

Git Version control system

main (root)

main
product
pull request
merge

1 repo = 1 tree
↳ have many branches

- ↳ git branch -m
- ↳ git checkout

cloning
↳ git clone
↳ git pull

Fork
