

Redux

- ↳ main.js [setup]
- ↳ import provide
- ↳ import createStore
- ↳ import reducer (create reducer, init state)
- ↳ create store
- ↳ start using central storage, use selector().
- ↳ action is
↳ action type is
↳ update in reducer.

action
↳ object

Redux

- ↳ works synchronous
- ↳ asynchronous operations, we need use
↳ middleware → Redux thunk / Redux saga.
- ↳ Action creators

⬇	⬇

- Disadv. of Redux
 - ↳ Redux has a lot of boilerplate code to be written
 - ↳ store setup
 - ↳ async operation, install thunk / saga
 - ↳ In Redux, everything (actions, reducers, state) are in separate

Redux Toolkit

↳ RTK

- ↳ create a store
- ↳ slices

↳ files = 2 slices.

↳ state, reducer, actions.
